DevOps Technologies: Setting up your environment for MS-Windows

Windows Users

- You will need **a 64 bit version of Windows 10**

  - A 64 bit version of Windows 7 or 8/8.1 can be used. However, Windows 10 x64 is highly recommended

Windows Users

- We will do a lot of Bash Shell scripting in this class. If you have Windows 10 you can use the native Bash Shell for Windows – also called "Ubuntu on Windows"

  – you might have to upgrade your Windows 10 to use this.

Windows Users

- Do a web search for "Ubuntu on Windows" or take a look at the following link for information about this:

  https://msdn.microsoft.com/en-us/commandline/wsl/install_guide

Windows Users

- If you have Windows 7,8,8.1 you can install Cygwin.
